## What is WiMotics?

Web Cloud mutitenant IoT Solution.

**WiMotics** is used through a standard browser by connecting to the application site, in which each customer sees and handles only its users and sensors.

**Author of WiMotics**
**Ing. Pasquale Guarino**
**Cell. +393396880456**

Currently Senior Software Engineer Consultant at Systsem Management Ltd., before Project Manager for the Dubai Metro project at Mediamobile SpA.
WiMotics is **Innovation Award 2012 Winner**.

## Where use WiMotics?

---- **LED Lighting** ----
Projectors Road - Industrial - Tunnel - Shed Offices - Buildings - Monuments - Stadiums - Gyms - Theatres

---- **Smart Cities** ----
Weather Stations - Air quality - Detection presence
Traffic Monitoring - Access Control - shook - Collapses

---- **Plants and Pipelines** ----
Conducted GAS - Losses liquids - Industrial Pipelines Water - Flooding - Floods - Home

---- **Fleet of Vehicles, Boats and Goods** ----
Fleets of vehicles - Passenger transport - Dangerous Goods
Fleets of boats (commercial and tourist ports) - Trucking - RFID Goods

---- **Agricultural Crops** ----
Parameters Crops - Plants Greenhouses
Irrigation systems - Climate and Environmental

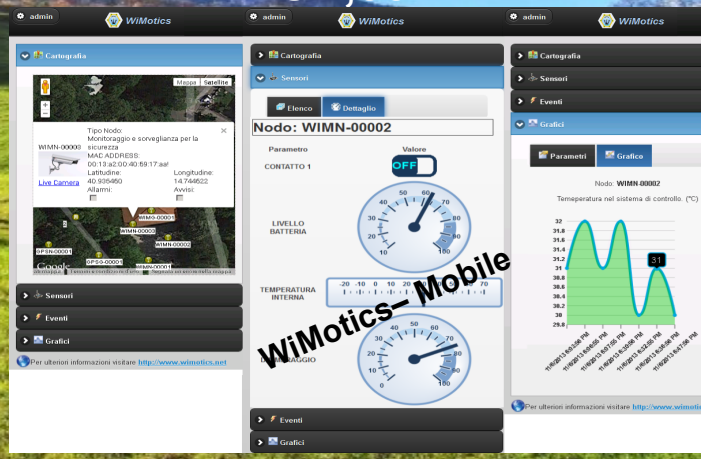
## Pricing of WiMotics?

Essentially there are two ways to use with their prices:

- Buy the project and install in your Datacenter the Solution
- Pay per use in SaaS mode(Software as a Service).

Project installation starting from
**€ 2.000***

Node monthly fee starting from
**€ 2,00***



* prices are excluding VAT.

WiMotics includes a set of services that interact with the sensor network:

- Measuring Sensors (Synoptic / Dashboard state)
- Actions through actuators (esmepio Chudi conduct)
- Engine Rules for notifications and alarms defined
- directly by the user in the browser
- Notifications Events / Alarms (SMS, EMail)
- Planning Controls for the sensor or sensors Groups
- Displays and controls on map (Google Maps)
- Encrypted and Secure Communication
- Geospatial Data WMS, WCS and WFS EU Directive 2007/2/EC "INSPIRE"
- Charts and Reports for the parameters of the indivi-dual sensor or group of sensors.
